

Platform:  **KEMPER**

Number of Profiles: **34**
Number of Performances: **24**
Number of Scenes: **60+**

Thank you for choosing Iconic Tones!

We truly appreciate your support and for being a part of our journey in redefining the standards of guitar tone excellence.

The **Iconic Tones™: Marsh Snake** pack is a meticulously designed collection of profiles and presets inspired by the legendary guitarist Slash, crafted for the **Kemper Profiler** platform (Stage, Rack, Head, Player). With a focus on delivering authentic, era-specific tones, this pack includes a variety of profiles and performances, capturing the essence of his sound through the decades.

What's Included in the Full Pack:

- 34 Profiles** to ensure versatility and maximum playability.
- 24 Performances** seeking to cover all Slash's signature tones.
- 60+ Scenes** made to reproduce the nuances of each song.

With this complete pack you'll have everything you need to nail those legendary tones from every era of Slash's career. Get ready to unleash the power and feel of the most iconic rock guitarist of all times.

On the following page, you will find the complete list of Profiles and Performances.

Instructions:

1. Download and Install Rig Manager

Download the latest version of **Rig Manager** from the Kemper website.

Install the software on your computer and connect your Kemper to the computer via USB.

2. Open Rig Manager

Launch **Rig Manager** and ensure your Kemper is recognized.

You should see your device listed in the **left-hand panel**.

3. Import Profiles

Drag and Drop .krig (profile files) directly into the **"Local Library"** or **"My Profiler"** section within Rig Manager.

Alternatively, right-click on your desired folder and select "**Import**", then choose the profiles from your computer.

4. Import Performances

To import .krig (performance files), navigate to the **"Performances"** section.

Drag and Drop the .krig files into an empty performance slot or right-click and select "**Import**".
